

DATA Acquisition Device

One Device. Complete Connectivity.

The Smartrise Data Acquisition Device (DAD) connects elevator controllers to the digital tools that keep buildings informed, maintenance teams responsive, and elevator systems performing at their best. Installed with every controller, the DAD captures operating data and makes it available across monitoring platforms, mobile tools, cloud dashboards, and third-party integrations.

Compatibility	All Smartrise C-Series Controllers
Interface	RS-485 (TX+, TX-, RX+, RX-)
Power Input	GN+, GN-, G24, REF
Indicators	FLT (Fault), HB (Heartbeat), WIFI
Connectivity	Wi-Fi enabled
Monitoring	Machine Room, Lobby, Remote / Cloud
Integrations	LiftNet, BACnet, braXos, custom workflows
Subscription	No annual software subscription required

Monitoring Capabilities

Machine Room Monitoring

Live visibility into controller data, car status, faults, alarms, I/O, calls, parameters, and system activity directly from the machine room.

Lobby Monitoring

Controller data delivered to lobby-facing monitoring displays for clear, building-level elevator status visibility.

Remote Monitoring

Cloud-based access to operating data, events, faults, logs, traffic activity, and performance reports from anywhere — no annual subscription.

Predictive Maintenance

The data foundation for fault tracking, alerts, maintenance dashboards, recurring-issue analysis, and proactive service planning.

Smartrise AIR Mobile App

Mobile connectivity for authorized field personnel to interact with controllers, support updates, access parameters, and streamline on-site work.

Third-Party Integrations

Data connectivity for LiftNet, BACnet, braXos, and custom integration workflows for external platforms and building management systems.

Built for Connected Elevator Operations

The DAD gives owners, consultants, service providers, and building teams a single hardware foundation for modern elevator visibility. From the machine room to the lobby, from the mobile app to the cloud, and from Smartrise platforms to third-party systems, the DAD delivers the data connection that makes intelligent elevator monitoring possible.

Connect the controller. Unlock the data. Power the ecosystem.
