

ELEVATOR CONTROL SYSTEM

C4 MACHINE ROOM MONITORING

Smartrise's Machine Room Monitoring lets you check the health of all cars in a group, showing mechanics real-time data for each car, including which floor, the direction of the car, car speed, and if a fault has occurred. Smartrise MRM also allows you to adjust any parameters, activate and deactivate Car Call Security, and place car and hall calls. Mechanics and Engineers will be able to store and backup all this information while also updating software on the fly.

BENEFITS

- Display live data of each car (floor, direction, speed, door states, if a fault has occurred)
- Store faults and alarms
- Adjust any parameters using the parameter section of the GUI
- Adjust Inputs and Outputs
- Adjust the time in a group
- Update software (bootloader), backup parameters, and restore parameters

FEATURES

- Display live data of each car in multiple groups
- Place Car Calls and Hall Calls
- Activate and deactivate Car Call Security
