

# SMARTRISE

MADE STRONG

## SOFTWARE LINK DOWNLOAD INSTRUCTIONS

# Software Link Download Instructions

---

## Software provided by online download link

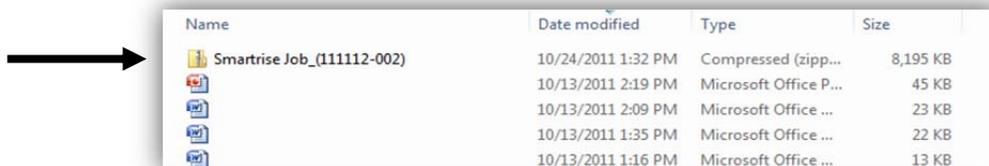

If an update was made to the job OR the CDs are missing, Smartrise can send an e-mail with a link to a downloadable zip file for the software. For example:

[http://smartrise.info/Software\\_packages/Smartrise\\_Job\\_\(111112-001\).zip](http://smartrise.info/Software_packages/Smartrise_Job_(111112-001).zip)

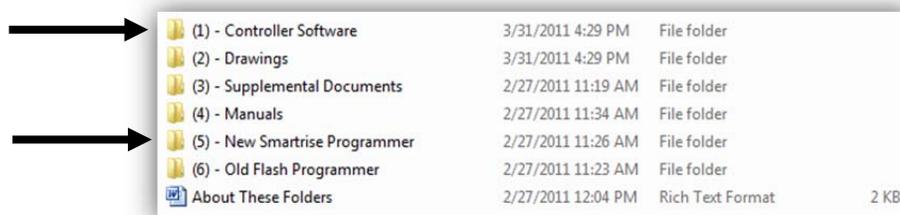

Click on the link and choose “Save As” to save the zip file to your laptop, preferably to your desktop.

There are several ways to open a zip file. Your laptop should have the capability to extract the file to a location of your choosing. If not you will need to download a free program from the internet to process this file.

- Navigate to the location you saved the file and double click on it to show the contents.

- Some laptops won't allow the Smartrise programmer to run directly from a zip file. To resolve this you need to copy all the contents of the zip file to a folder on your laptop. This will allow you to access all the folders necessary for installation (i.e. software, Smartrise Programmer, etc).

- Now that the files are extracted to your laptop's hard drive you can proceed with the installation of the programmer (if not installed already) and the software.
